COLLECTION OF OVER SEVENTEEN HUNDRED VARIETIES OF FOREIGN COPPER COINS.

This collection presents a chance to the younger collectors, or any Numismatists who are in way interested in the general foreign copper series, that does not often occur. The lots are not made up of one of each of the three or four countries named, and the balance, from 12 to 20, made up of common coppers; but each lot consists of proper coins—coins, where the term “etc.” is used, from the nearest state or country. All the coins are in nice condition, and many very scarce pieces are in the collection—the class of stuff that generally sell from 5c up to 50c or more EACH PIECE.

Please remember that there are not only no duplicates in each lot, but that there are no duplicates in the entire collection. While there may be a few lots of the same country, yet the coins in each lot of that particular country are entirely different.

- 740 1854 Small type. Extremely fine.
- 741 1855(?) **Small size.** While, according to the mint records, the 1854 was the last of the small types of gold dollars coined, this may be another of the many instances where the mint records are at fault. This coin is of an entirely different die than **any other date** of the small gold dollars. The wreath is thinner, the third berry from top within wreath is even with top of R. The figure 1 is larger, the date and word DOLLAR irregular, the DO being smaller than the rest. A die break through STATES OF. There is also a difference in Obverse die, but not so marked as the reverse die. We have not had a chance to submit this coin to some of the experts and specialists of the country, so we do not feel inclined to guarantee it, but **offer it as it is.** Even if the date has been altered, the die variety is a new one. In either case it is an interesting coin, and should bring a correspondingly fair price.
